Express.js Quiz

Express.js Quiz	Calling the next() function within a middleware function invocation will $$\star$\ s$\ points$$ immediately
yw4142@nyu.edu Switch account	Send a response to the client
☼ Draft saved	Invoke the next middleware function
Your email will be recorded when you submit this form	Invoke the next route function, if no subsequent middleware functions exist
*Required	
	Use the 3rd-party middleware module named 'next' to log the incoming request data to the command-line in nicely-formatted color-coded output.
The command, « npm init » * 5 points	
O Automatically installs all necessary 3rd-party modules for developing a back-end application.	The 3rd-party middleware, body-parser, makes all data sent to the server * 5 points with an incoming HTTP(S) request into an easily accessible object called
 Executes a wizard that, when complete, generates the starting version of the package.json settings file. 	req.body
Initializes a github repository for the given Node.js project.	req.bodyParser
Informs Node.js's package manager that you wish to use the Express.js back-end	req.files
framework in the code.	
	req.params
When a client uploads a file to a server, it is best practice to * 5 points	
Leave the filename as-is and simply save it to the server.	The configuration file in Express, js-based apps is called * 5 points
Modify the filename to ensure its uniqueness - often by appending the time/date or a	O .config
andom number - before saving it to the server.	o express.yml
	package.json
	requirements.txt
	O .project
